Covid-19 and your information - Updated on 6th December 2021

Supplementary privacy note on Covid-19 for Patients/Service Users

This notice describes how we may use your information to protect you and others during the Covid-19 outbreak. It supplements our main Privacy Notice.

The health and social care system is facing significant pressures due to the Covid-19 outbreak. Health and care information is essential to deliver care to individuals, to support health and social care services and to protect public health. Information will also be vital in researching, monitoring, tracking and managing the outbreak. In the current emergency it has become even more important to share health and care information across relevant organisations.

Existing law which allows confidential patient information to be used and shared appropriately and lawfully in a public health emergency is being used during this outbreak. Using this law the Secretary of State has required NHS Digital; NHS England and Improvement; Arms Length Bodies (such as Public Health England); local authorities; health organisations and GPs to share confidential patient information to respond to the Covid-19 outbreak. Any information used or shared during the Covid-19 outbreak will be limited to the period of the outbreak unless there is another legal basis to use the data. Further information is available on gov.uk and some FAQs on this law are available.

During this period of emergency, opt-outs will not generally apply to the data used to support the Covid-19 outbreak, due to the public interest in sharing information. This includes [National Data Opt-outs](#). However in relation to the Summary Care Record, existing choices will be respected. Where data is used and shared under these laws your right to have personal data erased will also not apply. It may also take us longer to respond to Subject Access requests, Freedom of Information requests and new opt-out requests whilst we focus our efforts on responding to the outbreak.

In order to look after your health and care needs we may share your confidential patient information including health and care records with clinical and non clinical staff in other health and care providers, for example neighbouring GP practices, hospitals and NHS 111. We may also use the details we have to send public health messages to you, either by phone, text or email.

During this period of emergency we may offer you a consultation via telephone or video- conferencing. By accepting the invitation and entering the consultation you are consenting to this. Your personal/confidential patient information will be safeguarded in the same way it would with any other consultation.

We will also be required to share personal/confidential patient information with health and care organisations and other bodies engaged in disease surveillance for the purposes of protecting public health, providing healthcare services to the public and monitoring and managing the outbreak. Further information about how health and care data is being used and shared by other NHS and social care organisations in a variety of ways to support the Covid-19 response is available.

NHS England and Improvement and NHSX have developed a single, secure store to gather data from across the health and care system to inform the Covid-19 response. This includes data already collected by NHS England, NHS Improvement, Public Health England and NHS Digital. New data will include 999 call data, data about hospital occupancy and A&E capacity data as well as [data provided by patients themselves](#). All the data held in the platform is subject to strict controls that meet the requirements of data protection legislation.

In such circumstances where you tell us you're experiencing Covid-19 symptoms we may need to collect specific health data about you. Where we need to do so, we will not collect more information than we require and we will ensure that any information collected is treated with the appropriate safeguards.

We may amend this privacy notice at any time so please review it frequently. The date at the top of this page will be amended each time this notice is updated.

This practice is supporting vital coronavirus (COVID-19) planning and research by sharing your data with NHS Digital. This transparency notice supplements our main practice privacy notice.

The health and social care system is facing significant pressures due to the coronavirus (COVID-19) outbreak. Health and care information is essential to deliver care to individuals, to support health, social care and other public services and to protect public health. Information will also be vital in researching, monitoring, tracking and managing the coronavirus outbreak. In the current emergency it has become even more important to share health and care information across relevant organizations. This practice is supporting vital coronavirus planning and research by sharing your data with NHS Digital, the national safe haven for health and social care data in England.

Our legal basis for sharing data with NHS Digital

NHS Digital has been legally directed to collect and analyse patient data from all GP practices in England to support the coronavirus response for the duration of the outbreak. NHS Digital will become the controller under the General Data Protection Regulation 2016 (GDPR) of the personal data collected and analysed jointly with the Secretary of State for Health and Social Care, who has directed NHS Digital to collect and analyse this data under the [COVID-19 Public Health Directions 2020](#) (COVID-19 Direction).

All GP practices in England are legally required to share data with NHS Digital for this purpose under the Health and Social Care Act 2012 (2012 Act). More information about this requirement is contained in the [data provision notice issued by NHS Digital to GP practices](#).

Under GDPR our legal basis for sharing this personal data with NHS Digital is Article 6(1)(c) - legal obligation. Our legal basis for sharing personal data relating to health, is Article 9(2)(g) – substantial public interest, for the purposes of NHS Digital exercising its statutory functions under the COVID-19 Direction and Article 9(2)(h) preventative medicine or the provision of health and social care treatment or the management of health and social care systems.

The type of personal data we are sharing with NHS Digital

The data being shared with NHS Digital will include information about patients who are currently registered with a GP practice or who have a date of death on or after 1 November 2019 whose record contains coded information relevant to coronavirus planning and research. The data contains NHS Number, postcode, address, surname, forename, sex, ethnicity, date of birth and date of death for those patients. It will also include coded health data which is held in your GP record such as details of:

- diagnoses and findings
- medications and other prescribed items
- investigations, tests and results
- treatments and outcomes
- vaccinations and immunisations

We will not share details for any patient who has registered a Type 1 objection with the practice. Where a Type 1 objection has been registered, we will not share your personal identifiable confidential information outside of the GP practice, except when it is being used for the purposes of your care and treatment or where there is a legal requirement to do so. Although there is a legal requirement to do so here, NHS Digital has agreed with the National Data Guardian, the British Medical Association and the Royal College of General Practitioners to respect Type 1 objections.

How NHS Digital will use and share your data

NHS Digital will analyse the data they collect and securely and lawfully share data with other appropriate organisations, including health and care organisations, bodies engaged in disease surveillance and research organisations for coronavirus response purposes only. These purposes include protecting public health, planning and providing health, social care and public services, identifying coronavirus trends and risks to public health, monitoring and managing the outbreak and carrying out of vital coronavirus research and clinical trials. The British Medical Association, the Royal College of General Practitioners and the National Data Guardian are all supportive of this initiative.

NHS Digital has various legal powers to share data for purposes relating to the coronavirus response. It is also required to share data in certain circumstances set out in the COVID-19 Direction and to share [confidential patient information to support the response under a legal notice](#) issued to it by the Secretary of State under the Health Service (Control of Patient Information) Regulations 2002 (COPI Regulations).

[Legal notices](#) under the COPI Regulations have also been issued to other health and social care organisations requiring those organisations to process and share confidential patient information to respond to the coronavirus outbreak. Any information used or shared during the outbreak under these legal notices or the COPI Regulations will be limited to the period of the outbreak unless there is another legal basis for organisations to continue to use the information.

Data which is shared by NHS Digital will be subject to robust rules relating to privacy, security and confidentiality and only the minimum amount of data necessary to achieve the coronavirus purpose will be shared. Organisations using your data will also need to have a clear legal basis to do so and will enter into a data sharing agreement with NHS Digital. Information about the data that NHS Digital shares, including who with and for what purpose will be published in the NHS Digital [data release register](#).

For more information about how NHS Digital will use your data please see the [NHS Digital Transparency Notice for GP Data for Pandemic Planning and Research \(COVID-19\)](#).

National Data Opt-Out

The application of the [National Data Opt-Out](#) to information shared by NHS Digital will be considered on a case by case basis and may or may not apply depending on the specific purposes for which the data is to be used. This is because during this period of emergency, the National Data Opt-Out will not generally apply where data is used to support the coronavirus outbreak, due to the public interest and legal requirements to share information.

Your rights over your personal data

To read more about the health and care information NHS Digital collects, its legal basis for collecting this information and what choices and rights you have in relation to the processing by NHS Digital of your personal data, see:
